HBV-related Antibodies

Beacle introduces hepatitis B virus-related antibodies developed through research for over 15 years.

Variations of antibodies

Various antibodies against HBV antigens are listed. Antibodies against HB surface antigens are all revealed genotype specificity. All antibodies can be used for western blot and ELISA, and useful for research and diagnostic purpose.

● Anti-HBsAg antibodies

Anti-HBsAg-S antibody, polyclonal:

Polyclonal antibody against S region of HB surface antigen. The antibody was raised against recombinant HBsAg-S protein (adr) in rabbit.

Anti-HBsAg-S antibodies, monoclonal:

Monoclonal antibodies against S region of HB surface antigen. The antibodies are produced against recombinant HBsAg-S protein (adr) in mouse. Two products are available.

Anti-HBsAg-Pre-S1 antibodies, polyclonal:

Polyclonal antibody against Pre-S1 region of HB surface antigen. The antibody was raised against Pre-S1 peptides in rabbit. Three products are available.

Anti-HBsAg-Pre-S1 antibody, monoclonal:

Monoclonal antibodies against Pre-S1 region of HB surface antigen. The antibodies are produced against recombinant HBsAg-L protein in mouse. Two products are available.

Anti-HBsAg-Pre-S2 antibody, polyclonal:

Polyclonal antibody against Pre-S2 region of HB surface antigen. The antibody was raised against Pre-S2 peptides in rabbit.

Anti-HBsAg-Pre-S2 antibody, monoclonal:

Monoclonal antibodies against Pre-S2 region of HB surface antigen. The antibodies are produced against recombinant HBsAg-L protein in mouse. Two products are available.

Genotype specificity of above antibodies are shown in backside.

● Anti-HB C antibody, polyclonal:

Polyclonal antibody against HBV core antigen. The antibody was raised against full length HBcAg in rabbit.

● その他

We conduct labeling of antibodies, and construction of ELISA system as contract service. Antibodies not listed may be available, please contact us.
